Internship Task

Task

It's hard to keep track of all the products and services that we have subscribed to every month. All we see is money deducting from our accounts, sometimes from services that we don't need anymore. Design a Subscriptions Tracking App which help users easily Manage and track their Subscriptions. like Netflix, Spotify, etc...

- Identify the problem statement and define the context
- Employ preliminary user and desk research
- Create at least 3-5 screens for the app
- Create a design system and mention reasons for the choice of color scheme and UI elements.
- Bonus: Use components and auto layout for the design system

Deliverable

Compile your work in a PDF and attach the Figma file and share it on email: design-team@zupay.in

Please note

- The task has to be completed and submitted within 3 days of receiving.
- Failure of submitting the task would result in automatic rejection from the recruitment process.
- Feel free to go above and beyond in the content of your submissions (more info, video, prototype, etc). These are optional but can help your application.
- Feel free to contact us at design-team@zupay.in case of any doubts or queries.
